

I'm not robot!

One of the oldest iPhone and iPad apps around, first released in 2009, GoodReader® marks its 10-year anniversary with a better-than-ever major upgrade, GoodReader 5.

When you first launch GoodReader 5, the most obvious change you'll see is that the look and feel is different. It's our hope that you'll be able to find all the features you've become familiar with intuitively, even if the way you find them has changed. We also hope you'll be able to discover new features on your own, with only occasional help from a few pop-up messages.

What's new in GoodReader 5? Everything!

Here are a few highlights:

-  Closing a file is now easier than ever.
-  Deleted files and folders are not completely gone. Not yet.
-  Split Screen\* for iPad: read side-by-side. Or even two different parts of the same file.
-  Multi-column file lists.

Export files with confidence:

-  Add password protection and AES-256 encryption to PDF files and ZIP archives.
-  Secure Photocopy: guaranteed elimination of all redacted text and images, hidden and deleted pages.

There's so much more to GoodReader 5! Keep exploring the app to discover all the new things, both big and small, that we've worked so hard to deliver to you.

And please remember, our customer support staff will be happy to answer all your questions: [support@goodreader.com](mailto:support@goodreader.com)

Enjoy!

Yours truly,  
GoodReader Development Team.

\*Some features such as Split Screen, and some others are a part of Pro Pack™, a paid add-on, purchased from the app.
